ANTI-CORRUPTION COMMISSION

COMMISSION MEETING FORM

MEETING NO.	33rd Commission Meeting
DATE:	7 August, 2026
TIME:	12:00 PM
VENUE:	Druk Dradhir Khang

AGENDA & DISCUSSIONS	DECISIONS
The revised Key Performance Indicators (KPIs) for the Annual Performance Dashboard 2026 -2027 This agenda was brought to the Commission following its earlier instruction to PPD to explore some revision of existing KPIs in view of several concerns raised, lessons learned and observations made from 2025-26 performance assessment. PPD presented the key outcomes of the cross-departmental/divisional exercise conducted to revisit the current KPIs for the coming year's performance planning and assessment. The exercise entailed rationalisation, fine tuning and downsizing the number of KPIs in alignment with the Commission's strategic goals. *The copy of the presentation to the Commission is attached as **Annexure 1**.* The following changes were directed by the Commission: - The disposal rate of Action Taken Reports (ATRs) on administrative complaints and disciplinary, administrative, and systemic referrals should clearly define "closure" as the completion of appropriate action, rather than merely forwarding the report to the concerned individual. Past instances have shown that referrals reported to the ACC as closed were later found to have had no appropriate action taken by the relevant agency. - To rephrase the KPI on "*Conduct compliance auditing on the implementation of the Integrity Vetting System in public and private agencies*" so	1. The Commission endorsed the revised KPIs for the Annual Performance Dashboard 2026 -2027. 2. A task force to be formed under direct supervision and guidance of Commissioner Gyeltshen, being Incharge of ICT. The task force will review, take stock and drive forward all ongoing projects CIMS modules relating to operation of investigation, complaints, intelligence and legal. 3. With regard to the on-premise hosting of eLearning applications, the Commission directed the ICT, SS to work out the necessary arrangements.

that it is not construed as overlapping with the compliance audits conducted by the LD, but instead focus on assessing and monitoring the implementation and effectiveness of the IVS in mandated agencies. - Revise the AIMS KPI and trend value to measure the number of agencies adopting AIMS, rather than its mandatory inclusion in the national M&E framework, which is beyond the agency's control. For sensitisation, specify a target number of programmes across ministries and autonomous agencies instead of an open-ended target. - Regional Offices may extend their engagement to the chiwog level where requested by Gewogs. The request received from Gewogs in Lhuentse shall be taken up after the elections. - To revise the target value for the "*Improved AD Performance Score*" from the proposed 86% to 98.82%, based on the performance score achieved in the previous FY. In addition, the following issues were also highlighted and discussed at length. - *Incomplete Cases:* The current KPI does not address the substantive investigation effort spent on cases that remain shelved for prolonged duration due to unavoidable reasons(e.g erstwhile MoIC cases). . Despite having invested time and resources, such cases don't get accounted for unless formally closed which, even if it does, could happen some years down the line which by the time relevancy and value of attribution is also lost. The Commission expressed such limitations need to be reviewed in future Performance Dashboards, to appropriately capture and assess open cases of such nature at both the agency and individual levels. - *CIMS:* The Commission observed that progress on the development and implementation of other CIMS modules are not only lagging but also opaque and working in isolation seemingly with very little or no internal coordinations between relevant departments/divisions. The Commission discussed the suggestion to form a	

common task force for better organisation and stewardship under unified supervision and leadership. - *Hosting of E-learning Programme:* Was informed that the ED was not able to bring the hosting of the e-learning programme back to the ACC due to reported current limitations in ICT manpower. - *Gift Rules and Housing colony:* While there are no separate KPIs for the Gift Rules and Tashiling Housing colony Design, the Commission noted that the related activities are incorporated in the respective targets of LD and SS. The Commission emphasized that these activities should continue to be pursued and their progress appropriately monitored and reported, without necessarily having separate KPIs.
