#	AGENDA & DISCUSSION	DECISION
1	Update on engagement of Internal Auditors in conducting CRM exercises – DoPE *PD apprised the Commission on the ongoing collaboration between the ACC and the Central Coordinating Agency for Internal Audit (CCAIA), MoF, in administering CRM across agencies. CRM, introduced in 2009 as a self-assessment management tool to identify and mitigate corruption risks within agencies, has been supported through three rounds of training of trainers conducted in 2018, 2020, and most recently in March 2026, including participation of Internal Auditors (IAs).* *To date, more than 45 CRMs have been administered across ministries, autonomous agencies, local governments, and corporations, with 13 initiatives specifically led by IAs within their respective agencies. Currently, implementation and monitoring of CRM in the DRC and eight RRCOs are underway. The BBS is in the process of developing its OIP, while three Dzongkhags (Lhuentse, Pemagatshel, and Trashiyangtse) are in the final stages of finalizing their CRM reports.* *Beyond these collaborations, PD highlighted that IAs have also been supporting the ACC in strengthening integrity, transparency, and accountability within agencies through functions such as corruption risk profiling, maintaining risk registers, and reporting suspicious corruption related activities. With the AIMS scheduled for pilot testing, PD highlighted the role of the IAs in its implementation and monitoring within their respective agencies.*	**Noted with following specific directives:** - **ensure that IAs serve as focal persons for maintaining and updating the risk registers of their respective agencies within the AIMS framework.** - **review the possibility of expanding the scope of CRM training to include a broader participation from agencies beyond IAs.** - **include the collaboration between the ACC and CCAIA as talking points for the upcoming meeting with the MoF.**

6	Others - Finalization of the 6th NIA *As the EAD is in the process of finalizing the 6th NIA report, the Commission emphasized the increasing need to ensure actionable recommendations from the upcoming NIA, including undertaking deeper analysis on the linkages between the NIA findings and the TI CPI results in order to facilitate evidence-based policy responses and strategic anti-corruption interventions. In the absence of such efforts, the Commission highlighted the risk of undermining the long-term sustainability and relevance of the NIA as a key instrument for informing the refinement and strengthening of existing anti-corruption tools and measures.*	**Decided to deliberate on the same during the final report presentation to the Commission.**
