ANTI-CORRUPTION COMMISSION

COMMISSION MEETING FORM

MEETING NO.	32nd Commission Meeting
DATE:	29 July, 2026
TIME:	02:00 PM
VENUE:	Druk Dradhir Khang

#	AGENDA & DISCUSSIONS	DECISIONS
1	**Apprise programme for visit to schools in the central region – ED, DoPE** *The Commission was apprised on the following:* - *regarding follow-up on expansion of integrity schools with the MoESD, it was apprised that the ED could not pursue the proposed expansion. This was because the Minister's directive, during the National Education Conference, had not been captured in the official conference minutes. As the Ministry relies on records for implementation and follow-up actions, it was reported that the Ministry was unwilling to take action.* - *proposed visit to schools and dzongkhag administrations in the central region from 9 – 15 August 2026.* - *interests expressed by the ICAC, Hong Kong following the regional meeting in July 2026 in Bhutan. The interests included discussions and exchange of experiences, while further exploring potential areas for collaboration.*	The Commission directed the following to the ED, DoPE: - To submit reports on the activities of the Integrity Clubs and the observance of National Anti-Corruption Day 2025. The Commission will decide on the timing of a meeting with the Minister thereafter. In the meantime, inform the Ministry's focal person that the Chairperson intends to meet the Minister again. - The proposed programme was approved in principle with a directive to include a visit to the Phobjikha Central School and to keep the NIA presentation brief in the Dzongkhag Administrations. - ED to engage with ICAC, Hong Kong at the working level to exchange experiences but directed that any institutional level collaboration or exchange visits should be pursued only after obtaining the necessary approvals and clearances.
2	**Proposal for verification of Disproportionate Assets (DA) for the Income Year 2025 – ADMD, DoPE** *Presented the proposal for verification of DA for Income Year 2025, as attached in* ***Annexure I.*** *It was noted that out of 25,500 declarations received, 5,725 declarations were flagged by the*	The Commission approved the proposed DA verification methodology and the proposed sample size for Income Year 2025. However, it directed that cases already under investigation or where there are complaints, should be excluded from the verification exercise to avoid duplication of efforts. ADMD, DoPE to coordinate with the

	automated declaration system for potential DA. A criteria-based sampling methodology was proposed, with 1,713 cases proposed for verification comprising Tier 1, Tier 2, Tier 3 and watchlist cases.	DoI to ensure the DA also complement ongoing cases, if any.
3	**Apprise on ECB's request to share raw data for NIA - EAD, DoPE** *ECB had requested access to the raw survey data relating to the Parliamentarians' Integrity Index from the 5th and 6th NIA to support institutional research and policy development.* *While noting that wider dissemination of the raw data would be contrary to research ethics, the Commission discussed that the data could be shared with the ECB on an exceptional basis, provided that the anonymity of respondents is fully preserved. The Commission also recognized that the request was exceptional, considering the CEC's previous engagement with the Commission and involvement in the NIA study.*	The Commission approved the sharing of the requested NIA raw survey data with ECB as an exceptional case, but directed to ensure that: - Any identifiable information of the respondents should be protected - data be used strictly for the intended institutional purpose and should not be shared to any third party. - such sharing shall not be setting a precedence; any future requests for access to raw NIA data from other agencies or individuals shall not be entertained. Therefore, any such requests should be brought to the Commission and decided on a case by case basis.
4	**Review post investigation referrals coordination and responsibilities – LD, DoPS & DoI** *It was highlighted that the existing roles and responsibilities for the post-investigation lead or contact point are not sufficiently clear. While the Terms of Reference (ToR) of DoPS require it to follow up on all post-investigation referrals, including coordinating cases with the OAG before they are charge-sheeted, this function has, in practice, been supported by the DoI. It was proposed that DoPS serve as the primary point of contact for all post-investigation follow-up, including pre-charge sheet cases, with DoI providing the necessary technical and case-specific support. In view of the current practice, which differs from the ToR, the DoI and LD emphasized the need to clearly define the roles and responsibilities, particularly as the TRUST system for collaboration with the OAG is being finalized, to ensure effective coordination, accountability,*	The Commission expressed disappointment that the concerned Departments and Divisions had presented the issues and challenges without proposing a practical solution. It directed them to revisit the matter, deliberate further, and submit a comprehensive way forward that best serves the ACC's objectives. The Commission directed that it would be in the best interest of the ACC for the DoI to remain the primary point of contact and continue follow-up on cases until they are charge-sheeted. This would enable the OAG to maintain direct and expeditious communication with the investigating team whenever additional information or clarification is required. Following the charge-sheeting of a case, the CFD, DoPS can assume the role of the central coordinating point. The Commission underscored that the SOPs, ToRs, and systems, particularly the *TRUST* system in this case, should facilitate effective coordination and operational efficiency. It emphasized that the focus should remain on achieving the broader institutional objectives rather than being constrained by existing processes or procedural requirements.

	and continuity throughout the post-investigation process. However, it was also noted that requiring DoPS to undertake pre-charge sheet follow-up poses operational efficiency challenges.	Accordingly, where SOPs, ToRs, or system processes impede effective coordination or operational effectiveness, it should be reviewed and revised as necessary.
5	**Apprise on the Invitation to the Global Expert Meeting on Intelligent Tools for Anti-Corruption Agency (ACA) Effectiveness to be held from 2 – 3 September 2026 in Ljubljana, Slovenia – PPD** *The Commission noted that the Chairperson had been invited to attend the meeting and that the organizers would cover the international airfare, accommodation, local transportation, and meals for a total of two participants from the ACC.* *The Commission emphasized the need for strong representation to effectively showcase the ACC's work and contribute meaningfully to the technical discussions.*	The Chairperson agreed to attend the meeting. The Commission further directed the HRC to nominate two officers to accompany the Chairperson, with one participant to be funded by the organizers and the other by the ACC. The nomination to consider the following: - One senior officer from PPD with comprehensive understanding of the Commission's overall functions and performance matters with demonstrated capability to effectively communicate and articulate presentation to other international experts; - One officer to present the ACC's Asset Declaration System during the technical sessions and contribute to discussions on intelligent tools for anti-corruption agencies.
6	Any other:	*AIMS:* Directed PPD to coordinate a session with the Office of Cabinet Affairs and Strategic Coordination (OCASC) to present the AIMS and discuss the way forward, instead of waiting for development of NIACS. *In-house Planning Workshop:* Endorsed PPD's proposal to convene a three-day in-house planning workshop to review and consolidate the ACC's performance framework.
