Suggestion was to ease the process by submitting a written request. - To conduct the regular informal meetings with journalists and editors to nurture partnership at the working level. To occasionally involve Media Spokesperson/Commission. - To focus on engaging the journalist and media firms as a sustainable partner rather than just involving them for coverage of events. Protocol to administer & manage common Social Network Forum

Purpose

In general, social network applications (WeChat, WhatsApp, Telegram, LINE, Viber, etc...) allow instant sharing/communication of ideas/information through text, audiovisual and graphics, etc. Even in the workplace, social network applications have gained popularity for easing real time communication and facilitating online collaborations. Hence, it is equally important for the ACC to optimize the existing social network applications to enhance ***team communication, collaboration, coordination*** *and* ***cohesion***.

However, given the sensitivity of the ACC's mandate, it is critical to be cautious in adopting the application that provides highest level of privacy, confidentiality and data security. To this, while most of the existing social network applications have more or less similar features in terms of instant sharing/communication, *Telegram* is considered as one of the most secured applications with end-to-end data encryption.

In view of the above, Telegram is proposed to be adopted as the Official Social Network Forum in the ACC. Further, to ensure effective use of Social Network Forum in the ACC, this protocol is being adopted.
