#	AGENDA	DECISIONS
1	DA findings for the declaration period 2020 – ADMD	Before presenting on the DA findings for the declaration year 2020, the ADMD apprised the Commission on the status of the decision on DA cases for the declaration year 2019, ToR for DA Committee, and DA trend over the last three years. With regard to declaration year 2020, from the total of 1559 (Schedule – 136 & Schedule II – 1423) DA cases verified, which is 31.3% of the total DA cases flagged by the system, the ADMD apprised that maximum (89.61%) portion of DA cases pertain to declaration error followed by system error (4.94%). Some of the underlying issues behind declaration error are wrong/incomplete declaration, typo error, and first time declarant, among others. Only one DA case was found to require further action. DA case against the same individual was decided for further action during the declaration year 2019 and is currently with the DoI. About 84 DA cases were found to have no issues. In keeping with the above findings, the ADMD presented the DA Committee's recommendation to drop all the DA cases prompted due to the declaration and system error including those without any issues and share only one DA case to the DoI as an additional information. To this, the Commission endorsed the recommendations of the DA Committee. In addition, with the on-going enhancement of online AD system and its interoperability with other data repositories, the Commission directed the ADMD to increasingly optimize the available data in mainstreaming anti-corruption measures and facilitating other Departments/Divisions such as DoI, TSD, etc. At the end of the day, the Commission emphasized the need to innovate new ideas/methods to prevent illicit enrichment, discourage individuals from indulging into unethical practices and ultimately encourage individuals to uphold integrity.
