ANTI-CORRUPTION COMMISSION

COMMISSION MEETING FORM

MEETING NO. 86th Commission Meeting

DATE: 29 June 2022

TIME: 3:00 PM

VENUE: Third Floor Meeting Room

#	AGENDA & DICSUSSION	DECISIONS
1.	**Present SRS on Mobile APP- DoPS** *The development of mobile App to manage complaints is one of the indicators in the 12th FYP the Department proposed to develop the app (details as attached in in Annexure I).* *With the proposed budget of Nu. 0.500 million, the proposal of the Department is to introduce the app as an alternate platform to lodge complaints and include features to track the status of the complaints lodged through app along with extended information (on prevention and education) platform. Towards this, in order to facilitate the reporting of corruption, the ACC introduced dedicated mobile numbers as additional modes for reporting and following up on the complaints starting January 2021. Further, from February 2021, the ACC launched social media (WhatsApp and WeChat) platform called Juenlam ACC to receive complaints. However, one of the recommendations through studies such as NIA and NCBS was to inform complainants on the status of their complaints, thus the objective of having a dedicated ACC mobile app was initially to cater towards proving facility to track the status of the complaints lodged through any mode and not just on the complaints lodged through the app.*	**The scope of the mobile app to focus just on Tracking of complaints lodged through any mode. Therefore, see its effect on the CIMS when pulling/pushing of the required information.** **Department to make the SRS comprehensive and based on the available budget, the app to be developed on phase wise. Overall, there should be minimal human interface and aim for full automation when generating information.** **As of the outcome (the information that can be shared), Department to discuss with DoI on what can be shared especially once the complaint is qualified for investigation.** **Concerning measures to enhance the filling of complaints such as towards catering anonymous complaints, providing information on the advantage and disadvantage of remaining anonymous; the confidentiality of identity; and other information such as elements of corruption offences; etc to be added as a feature on the website.** **The Department to look into assigning a Prefix for different mode of complaints such as 1 for walk in; 2-mail; 3-fax, etc for ease of reference and analysis.** **The Department to present a demo App to the Commission.**

2.	**Present the proposal on ACC's LTT Policy and the minimum active workforce requirement in the ACC- All HRC members** *Towards ensuring minimum active work force is maintained at all time, the 61st HRC meeting decided to propose the threshold at 80% and the draft policy on LTT for ACC staff was also presented for approval (details attached as Annexure II).* *While keeping a threshold may affect the HR strategies, not maintaining an active workforce threshold and allowing staff to leave without any intervention will only add burden to the remaining staffs, thereby affecting the effectiveness and efficiency of the work.*	**As a general rule, employee retention rates of 90% or higher are considered acceptable and an agency should aim for a turnover rate of 10% or less. Moreover, the need to redouble our effort towards driving the mandate has been highlighted during the 114th National Day Address. Thus, decided to keep the minimum active workforce at 90% and an executive order to be shared immediately so that staff can plan accordingly.** **However, as reflected in the Policy, exception to be made based on the criteria.**
3.	Others:	

Commissioner **Commissioner** **Chairperson**

Introduction

1. The complaint received through ACC webmail is still the highest indicating that the literate section of the population reporting corruption.
2. Considering the wider reach and coverage of two telecom service providers, introducing alternative platform using Mobile Application (Mobile Apps) with features in English and Dzongkhag language.
3. Encourage corruption reporting by any individuals, from any location as long as there is an internet connectivity.
4. serve extended function of public education and advocacy besides reporting

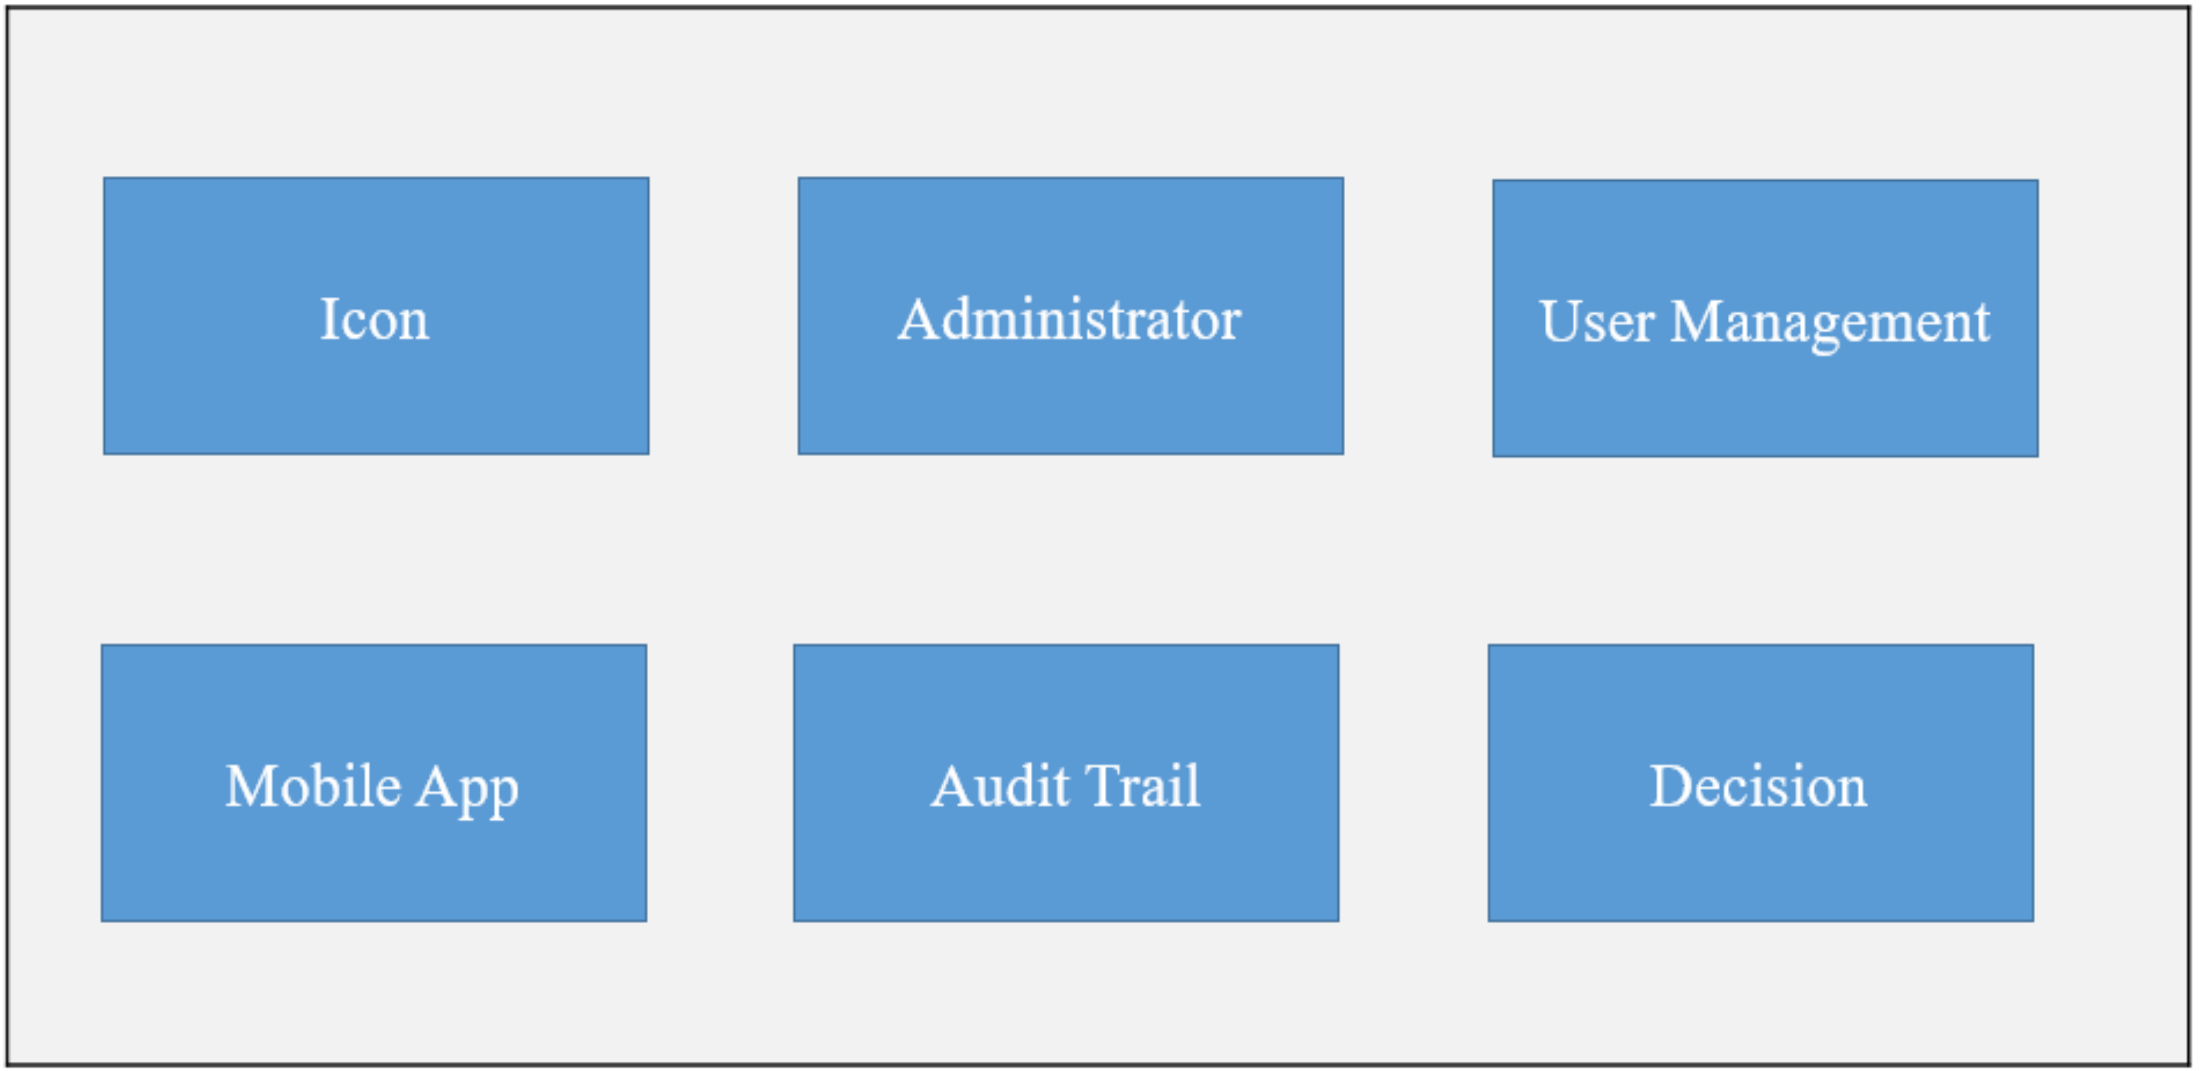

Product Perspective

- ✓“Native App” operating on any mobile application platform (android, windows or iOS)
- ✓The system to be accessible to multiple users, it should support at least 50 concurrent users.

Business process

Modules of the App

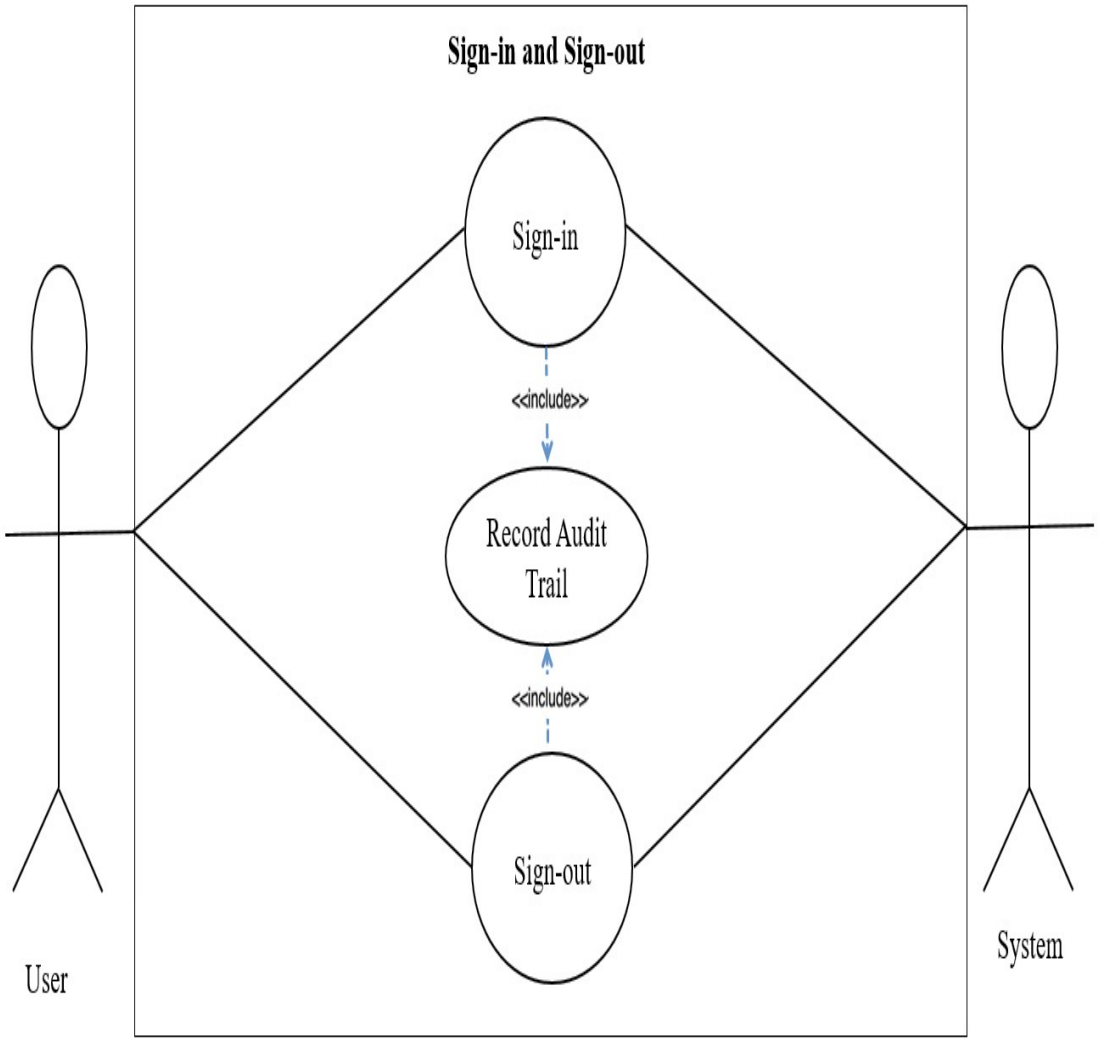

Functional Requirements

Sign-in & Sign-out

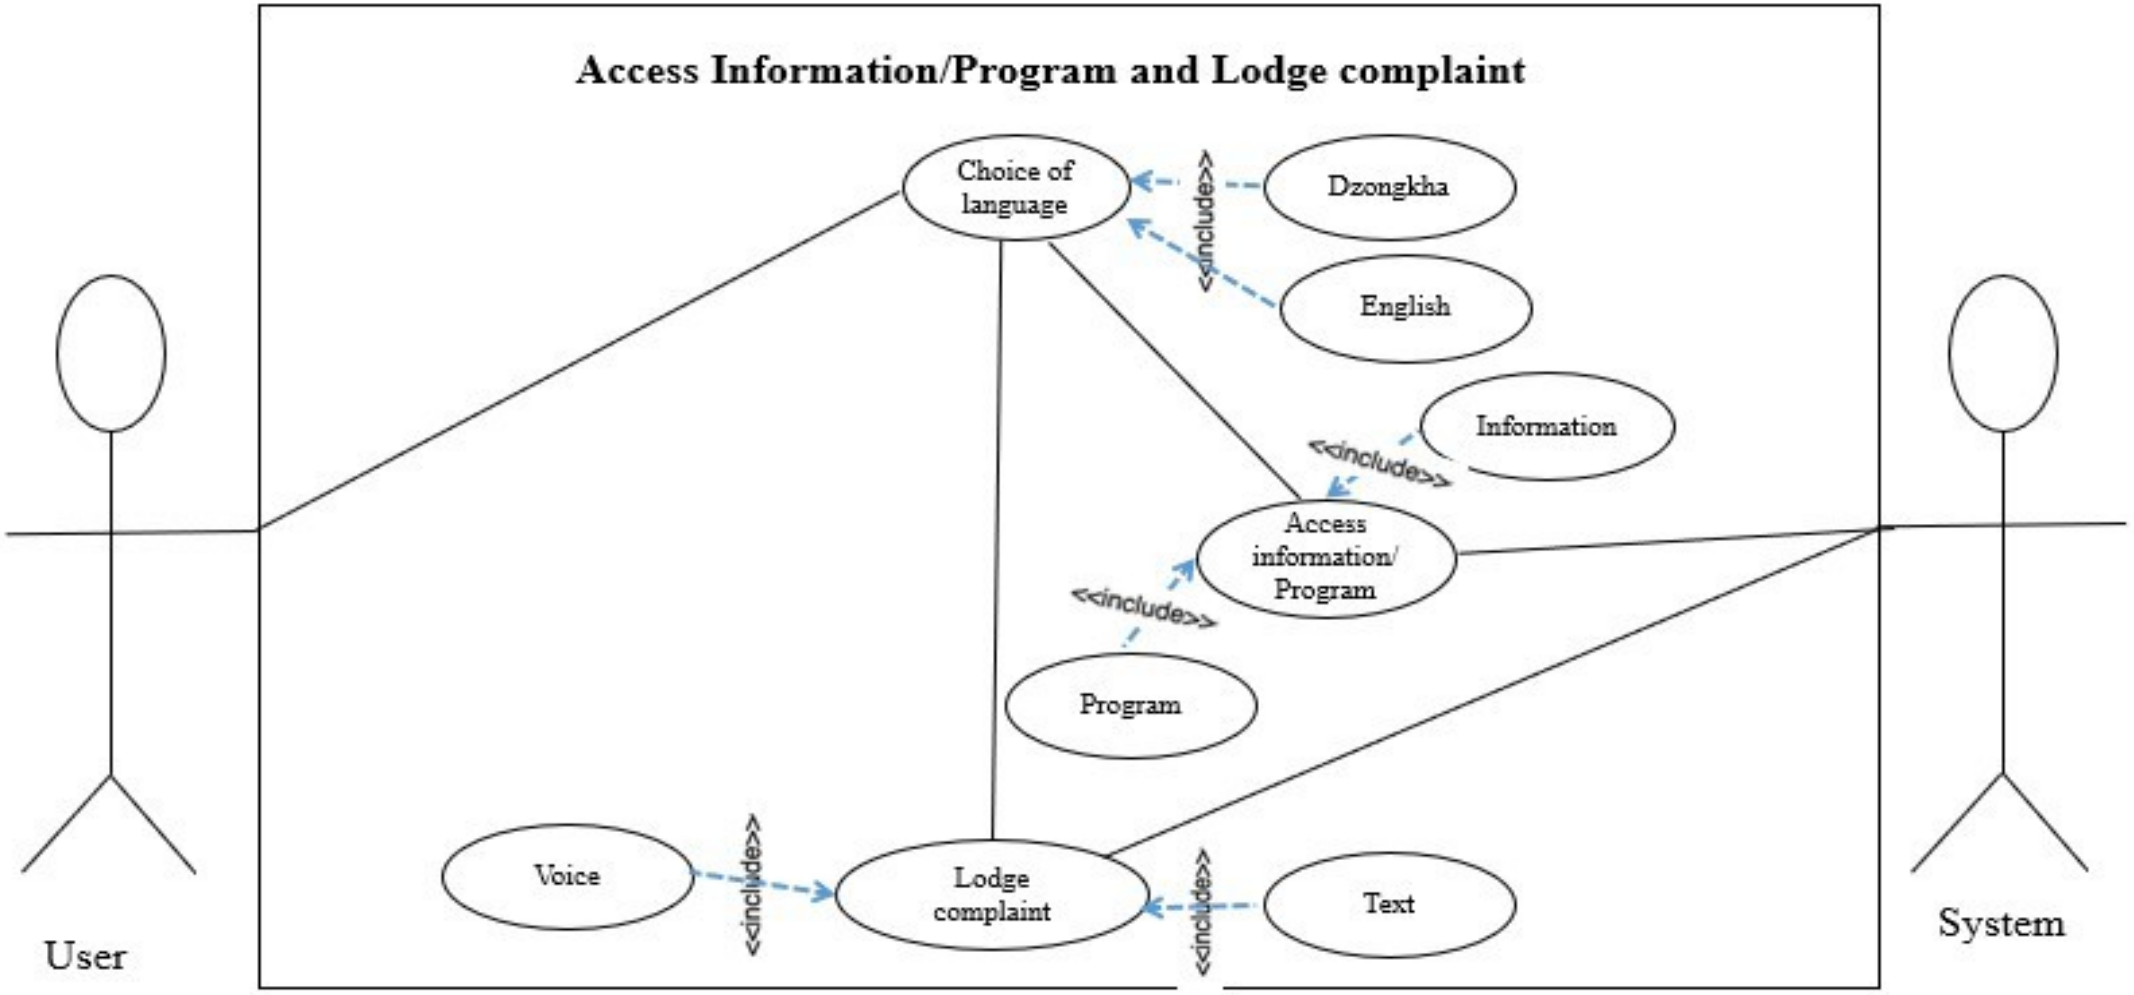

User sign-in and sign-out will remain one of the must-have security architectures to ensure that the only genuine users can access the system.

The system will enforce sign-in requirements before being able to lodge the complaint.

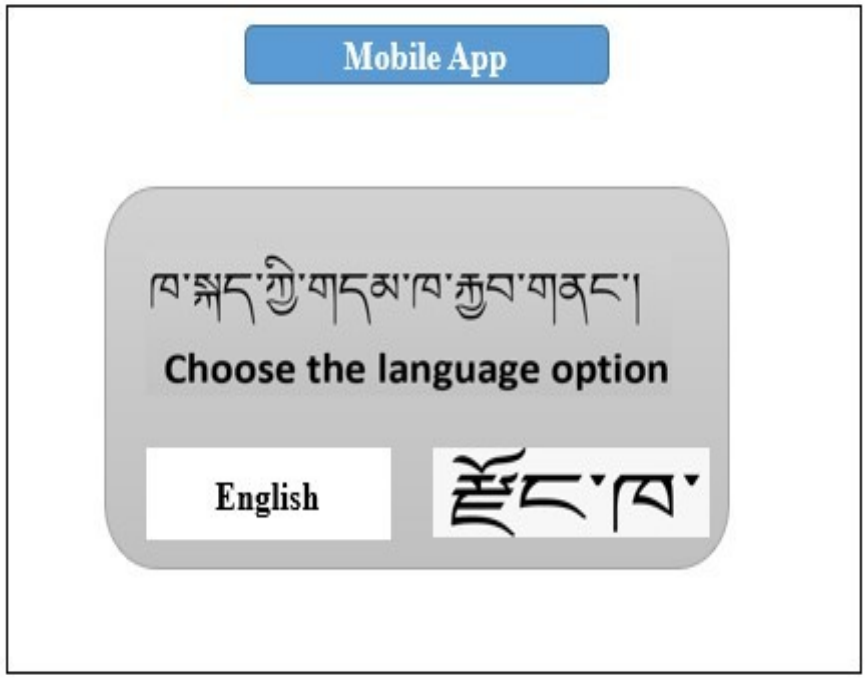

Access information/program or Lodge complaint use case diagram

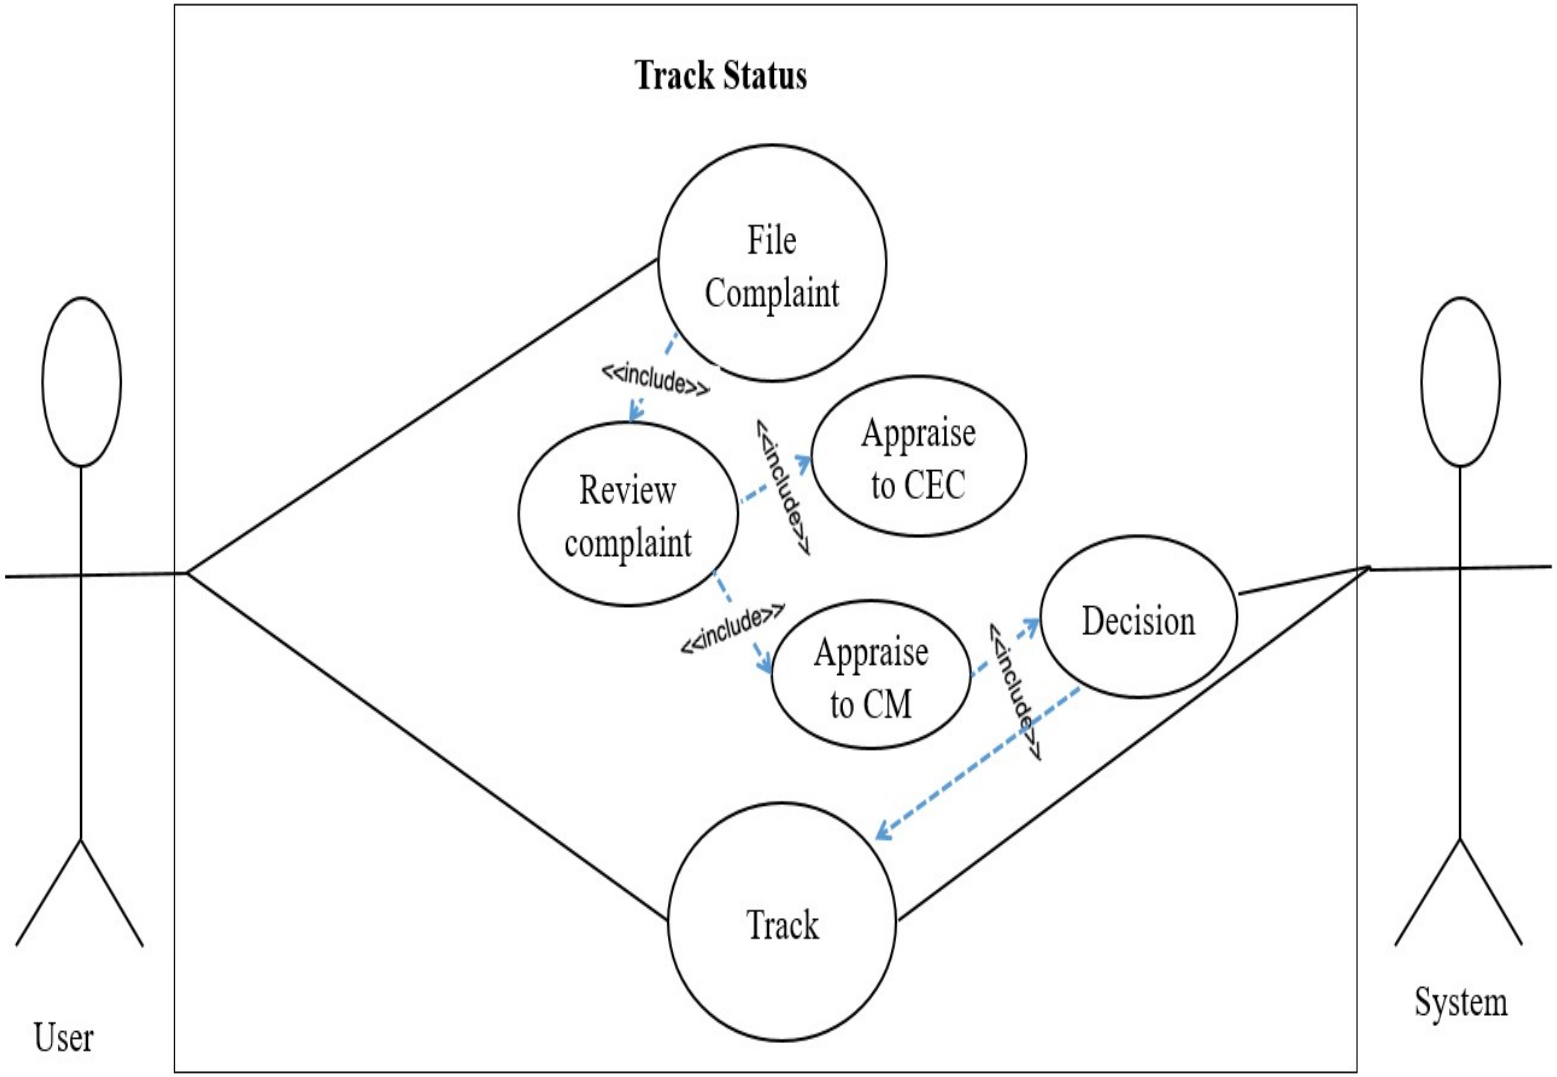

Access information/program or Lodge complaint mock screen

Track Status

This module will ensure the user to track the status of the complaint lodged with the Commission.

Track Status mock screen

Thank you

Policy on Long Term Training (LTT) for ACC staff

INTRODUCTION

Since its inception in 2006 with eight officers, the Anti-Corruption Commission (ACC) has come a long way in institutionalizing a strategy for the betterment of its staff and to enhance effectiveness and efficiency in fulfilling its mandate. Despite the support and initiatives introduced for the staff, the ACC continues to face human resource shortage, in particular retention of employees is still a challenge with 39.51% of staff either resigning or getting transferred within one to two years of service in the ACC. The Annual Report 2018 clearly indicated that separating staff are mostly in Professional & Management Category (PMC-72.73%) with 13 staff over 7 years of experience.

As a learning organization, the ACC encourages professional development and career advancement for all the staff. However, considering the alarming trends of staff either leaving the organization or availing Extraordinary Leave (EOL)/study leave, it is felt imperative to establish a policy to maintain minimum workforce to deliver the mandates at all times to come.

SCOPE

Although the ACC is an independent constitutional office, the staff being civil servants are under the Royal Civil Service Commission (RCSC), governed by the Bhutan Civil Service Rules and Regulation (BCSR) 2018. Hence, all human resource related matters vis-a-vis HR Management & HR Development are managed by the RCSC. However, in terms of the Long-Term Training (LTT), the BCSR 2018, section 10.13.3 has empowered the respective agency's Human Resource Committee (HRC) to decide the threshold of those availing EOL and Study leave. Thus, this document focuses on maintaining the sufficient workforce for the ACC through managing the leave for LTT (studies). This policy intervention is for internal consumption and shall apply only to the staff of ACC.

1. Extraordinary Leave (EOL)

- EOL shall not be granted to pursue any form of LTT (self-funded/scholarship)

2. Study Leave

The recent stats of the ACC clearly indicated that 77% of the staff under PMC, age ranging between 23-41 does not have a masters degree and it is a great concern for the agency. As much as the ACC finds it important for the staff to develop intellectually, it is of concern that many experienced staff are leaving for LTT. Therefore, to balance out between the outgoing and incoming human resources, the HRC will consider granting study leave based on the following criteria;

a. Seniority in the ACC;
b. Relevancy of the study with agency's mandates;
c. Competitiveness of the scholarship;
d. Age of the applicant;
e. Performance rating; and
f. HR record

Given the complex phenomenon of corruption cases, it is critical to ensure that the ACC staff remain conversant through the advancements of skills and technologies in preventing and combating corruption. So, this demands higher levels of com-petencies, intelligence, effective networking and enterprising capacity development programs with changing corruption dynamics.

However, the limited financial resources augmented by the increased number of staff compared to the past, sending staff to pursue LTT is still a challenge. Therefore, as an alternative to it, the agency will explore opportunities to advance skills of the staff through **short term specialization courses.**

3. Leave for those joining the ACC on Lateral Transfer

From the past experiences, it is noted that some of the staff coming on a lateral transfer seems to avail either EOL or study leave right after getting recruited in the ACC. This issue has aggravated the already existing challenges of the ACC in terms of managing the required workforce. In doing so, more time and resources are being wasted in the process. Therefore, to ensure effective recruitment and management of staff, those staff joining on lateral transfer should at least serve a minimum of **3 (three)** years in ACC before availing EOL or study leave and the same shall be communicated to the individual during the recruitment process.

Conclusion

The ACC is enforcing the aforementioned interventions as a means to de-escalate existing HR challenges to ensure that the ACC has enough active workforce to fulfill its mandate of fighting corruption.
