ANTI-CORRUPTION COMMISSION

COMMISSION MEETING FORM

MEETING NO.	202nd Commission Meeting
DATE:	11 December 2024
TIME:	02:00 PM
VENUE:	*Druk Dradhir Khang*

#	AGENDA & DISCUSSION	DECISION
1	**Monthly update on the status of Escrow Account for the month of November – DoPS** *EMS, DoPS updated the Commission on the monthly escrow account of Nu. 36,833,811.59 as of end of November, 2024.*	**The Commission noted the update on the escrow account and provided specific directives as follows:** • **Ensure the maintenance of clear and complete data, accurately documenting the amounts surrendered to the Ministry of Finance, the administrative sanctions imposed, and the recoveries made. Additionally, directed to present these data in the next Commission Meeting.** • **Ensure to urgently prioritize the automation of these data within the CIMS to minimize administrative burdens and ensure greater efficiency and effectiveness in operations.** • **Provide a timely update on the current progress of the CIMS module development.**
	Update on the meeting with Attorney General *Director Wangay updated on the meeting with Offtg. Attorney General on 9 December 2024 regarding the request to retain the current two Legal Officers in the ACC.* It was communicated that the ACC is not requesting for new LOs, but rather those who are already working in the ACC. In response, the OAG stated that they would provide an update after their Management Meeting.	**The Commission noted the update.**
2	**Present proposal on conducting corruption risk assessment in media sector – PD**	**The Commission approved the proposal with the following specific**

	PD, DoPE presented the proposal on conducting corruption risk assessment in media sector (Detailed presentation is annexed)	**directives:** • **Ensure the Commission is kept regularly updated given the sensitive nature of the assessment.**
3	**Update on the NACD commemoration – ED** *ED, DoPE provided an update on the NACD commemoration, highlighting the following key events and initiatives:* - *ACC theme song to be performed by the students of Jigme Losel Primary School on 21 February 2024.* - *A marathon is scheduled for 15 February 2025, in collaboration with RCSC. RCSC will be responsible for organizing the marathon with approval from the Bhutan Olympic Committee, media coverage, traffic management, and printing of banners. ACC will manage the provision of refreshments and prizes while also being in charge of determining the content of the messages to be displayed on the banners.* - *Members of the Integrity Club at GCIT are planning a project to raise awareness on corruption issues and anti-corruption measures. To this, the ACC officials are expected to prepare and present content related to ACC's initiatives.* - *GCIT proposed for a project wherein students will develop products to address corruption issues. However, the discussion shifted towards a business-focused approach. As a result, ED decided not to move forward with the proposal.* - *Series of session for marginalized groups and scout are planned in line with the NACD.* - *An online quiz competition to be conducted on 17 December.* - *Proposed to commemorate NACD in PRO with the objective to create awareness in the regional areas.* - *The development of content training materials for the Scouts in collaboration with MoE is nearing completion, aiming to train focal persons effectively.*	**The Commission noted the update with the following directives:** • **The message during the marathon to align with the concept of promoting both physical and mental well-being.** • **Explore other alternative options to be considered for the prizes, rather than offering cash.** • **Suggested to commemorate NACD in TRO.**
4	**Others-Update on the meeting with GCIT- DG** *DG provided an update on the meeting with the*	• **The Commission viewed the initiative as a positive step forward and suggested to**

	officials from GCIT regarding the collaboration areas: **Blockchain Course** - *During the meeting, the DG conveyed that the primary expectation from the training program is to equip officials with a robust understanding of blockchain technology, ensuring they grasp the fundamental principles and concepts. Secondly, DG highlighted the training to emphasize on the operational aspects of blockchain, providing practical insights into its applications and implementation.* - *The scope/areas of the training module have already been shared with Ms. Namgay Dema, who will review it and provide feedback in due course. Regarding the funding aspect, the GCIT have assured that they will revert with updates.* **Capstone project** *DG laid down various project proposals as below:* *1. Command and Control System* *Currently, operations are entirely manual and lack digital platforms to provide real-time guidance to the Investigation Officers. To address this, an integrated command and control system is needed, enabling the Operation Commander to manage, plan, and direct efficiently during operations. The proposed solution should connect seamlessly with the CIMS, facilitating enhanced communication, resource allocation, and streamlined management, ensuring effective execution of a case. To this, the GCIT officials responded that such projects can only be managed by the full stack team, however, currently they are all fully engaged with other projects, so they suggested to take the project during next semester in August.* *2. Analysis of Call Data Record (CDR)* *Currently, there is no standardized method for analyzing CDR by the Investigation Officers (IOs). Since CDRs do not contain individual names, the project should focus on developing approaches for analyzing CDR data aiming to uncover call patterns, trends, and behaviors.* *3.Family mapping using AI* *In order to develop a comprehensive family tree,*	**proceed.** • **Directed DoI to present the CIMS to the GovTech Secretary by the end of December or early January.** • **Directed PPD to oversee and handle the technical aspects and price negotiation with JAGGLE.AI to ensure readiness and alignment with the planned objectives.**

	the project should delineate familial connections based on the available data and present the relevant relationships in either a tabular format or through a graphical representation, such as a family map. This approach will effectively illustrate the familial structure, enabling the IOs to effectively and efficiently draw analysis in a case. *To this, the officials of GCIT agreed to entrust these two projects (Analysis of Call Data Record and Family mapping using AI) to a group of AI-based team. Subsequently, a letter of acceptance will be submitted to the ACC.*
